Work Experience

React Developer

2021 - Present

BM Technologies f/k/a BankMobile

- Complete rewrite of the current production web application
- Componentizing numerous existing features using legacy AngularJS code as a guide for functionality
- Identified pain points in previous architecture
- Ensure new architecture was followed to ensure a rock solid foundation

Web and Mobile Developer

2018 – 2021

BM Technologies f/k/a BankMobile

- Developed core banking features on both web and mobile, utilizing AngularJS and Xamarin.Forms respectively
 - Active user base in the hundreds of thousands
- Spearheaded the implementation of an in-app direct deposit switchover feature that 35% of users have utilized
- Integrated third-party service to encourage App Store and Play Store reviews which resulted in more than a 50% rating increase
- Collaborated with backend, business analysts, and designers in a fast-paced Agile environment
- Updated existing unit tests to be scenario based unit tests for every pull request submitted

Mobile Developer

2016 – 2018

Dossier Systems

- Single Handedly implemented mobile application that replicated existing web functionality
- Application design targeted both phones and tablets on Android and iOS
- Designed architectural diagrams and facilitated reviews by stakeholders and senior developers
- Helped shape in-house REST API for better use across both web and mobile applications

Education

2012– 2017

B.S. Software Engineering

Drexel University

Minor in Social Entrepreneurship, 3.23 GPA, Dean's List
